* An occupation is defined as significant in terms of labor demand if the number of unfilled openings for a specific occupation equals five percent of the occupational category it falls in. For example, if there were 100 unfilled openings in all clerical occupations, then any one occupation in the clerical group that had five or more unfilled job openings would be deemed in demand.

1/ All nonagricultural job openings received, filled, or unfilled during the reporting period. Openings filled can include openings unfilled in the previous quarter, thus it is possible to fill more openings than are currently received. Long-term openings are unfilled for 30 days or longer.

2/ Active applicants are individuals currently available for work. Applicants per unfilled opening = applicants divided by unfilled openings.

* An occupation is defined as significant in terms of labor demand if the number of unfilled openings for a specific occupation equals five percent of the occupational category it falls in. For example, if there were 100 unfilled openings in all clerical occupations, then any one occupation in the clerical group that had five or more unfilled job openings would be deemed in demand.

1/ All nonagricultural job openings received, filled, or unfilled during the reporting period. Openings filled can include openings unfilled in the previous quarter, thus it is possible to fill more openings than are currently received. Long-term openings are unfilled for 30 days or longer.

2/ Active applicants are individuals currently available for work. Applicants per unfilled opening = applicants divided by unfilled openings.
